Countries which already have statutes in force are turning to new areas of protection or are engaged in revising or complementing existing statutes. For instance, physicists have a quantum description for light, which states that light particles, or photons, are actually excited bundles of energy that rise up from a background electromagnetic field - like water waves swelling up from an otherwise still ocean. Nothing could be significantly better purpose. Once we were inside, the chef came running into the cafe to see who had ordered an 8 egg omelette. I do not know because I do not believe that there is a recipe for happiness.
