For example, the Richardson coefficient A is still predominantly only determined by empirical curve fitting and cannot be well predicted theoretically for most materials. Hatsopoulos and Gyftopoulos, Going forward, the role of theory and simulations has a two-fold challenge: 1 to relate the materials properties to emission, stability, and account for new mechanisms such as PETE, NEA, and quantum effects and 2 to provide guidance on system-level effects that include thermal transport, photon coupling, and overall system operation characteristics. Responsible readings of the book of Revelation acknowledge its images, and interpret them according to normal literary conventions.
